"Our relationship with DataSite provides us with a world-class facility management team which has translated into 100% uptime for our data center."

-Myron Brown
CIO of Consulate Information Technologies

DataSite

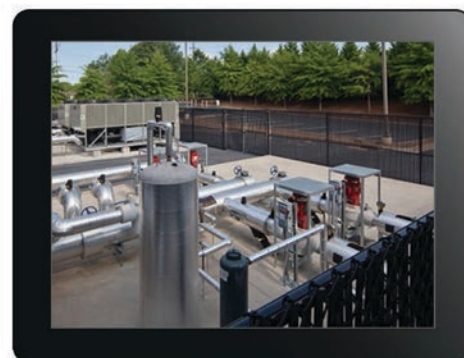

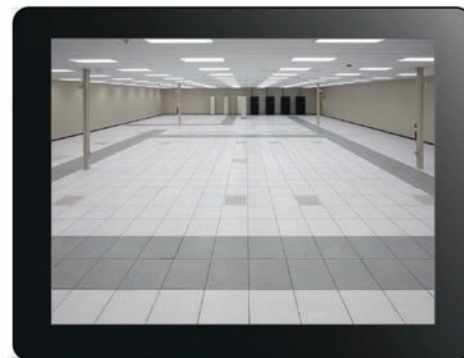

DataSite data centers are a unique blend of purpose-built, specially constructed data center facilities and expertly managed data center infrastructure designed to offer affordable data center options that meet the demanding power requirements and up-time requirements of the modern computing environment.

Customized Data Center Solutions

DataSite offers a range of data center solutions from single locking cabinets to secure colocation suites to enterprise class facilities with dedicated infrastructure. Scalable infrastructure available at a moment's notice, variable power densities and customizable infrastructure redundancies provide a world class facility while balancing the budget.

Metered Power

Most every data center operator charges a flat rate regardless of power utilization plus an additional cost for redundant power. Not at DataSite. In all colocation cages and private suites DataSite offers consumption-based billing so you only pay for the actual amount of power consumed by your IT systems. DataSite clients are saving approximately 50% on the power costs charged in other colocation facilities.

DataSite Atlanta

- Freestanding Building on Approximately 7 Acres
- 15 Miles from Heart of Downtown Atlanta
- Outside the 500-Year Floodplain
- Anonymous Single-Story Building
- 73,000 Sq. Ft. Facility
- Adjacent to DOD Protected Airspace
- Pre-action Dry Pipe Fire Suppression System
- Diverse Underground Fiber Entrances
- 30 Minutes from Hartsfield-Jackson Airport

Massive Power Infrastructure

- Metered Power Billing
- Flexible Power Density
- Underground Utility Feeds
- N+1 or 2N UPS Power
- Immediate Proximity to High-Voltage Utility Substation

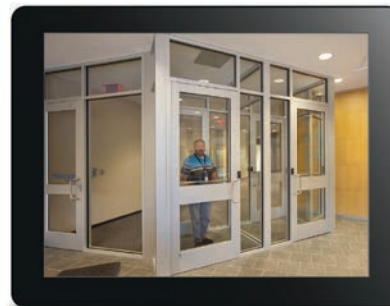

State-of-the-Art Cooling

- Maximum Heat Rejection
- Complete Redundancy
- Appropriate Humidity Levels
- On-site Professional HVAC Staff
- Up to 600 watt/sf Power Density
- Chilled Water for Water Cooled Equipment

DataSite Offerings

- Colocation Cages & Locking Cabinets
- Private Data Center Suites
- SSAE-16 (SAS-70 Type II) Audits
- Metered Power Billing
- Flexible Power Densities

Impenetrable Security

- Anti-Tailgating Mantraps
- Extensive Video Surveillance Systems
- 24/7 On-Premise Security Guards
- Vehicle Blockades and Equipment Checks
- Isolated Shipping, Receiving and Staging Areas
